

Stiffeners are an indispensable wave soldering accessory to hold straight and support routed or oversized boards straight, preventing solder flooding of the PCB due to bowing. Edgecovers and stiffeners can also be used to protect gold fingers on PCBs eliminating the need for masking with Kapton® tape.

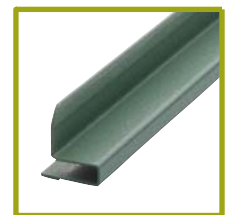

- Reusable
- Mask gold fingers on PCBs
- Barrier to solder flooding
- Prevent PCB warpage
- Teflon coated spring steel
- Length from 55 mm to 320 mm
