

Information for Product: **Ionized Environment Electrostatic Locator**

Suited for ESD control applications in ionized manufacturing environments. Combines many features of precision electrostatic measuring instruments in a compact package at a relatively low cost.

Additional information available below.

ACL 400 Ionized Environment Electrostatic Locator

Obtain accurate voltage readings in an ionized environment. ACL 400 meter is chopper stabilized for use in ionized areas. This easy to use meter provides continuous readings without the need for rezeroing.

*Stable operation - reorders output for continuous monitoring over several hours

*Quick, accurate, repeatable measurements from 0 - 30,000 volts

Weight: 6 ounces

Size: 4.4" X 2.6" X 1.3"

Accuracy: Better than +/- 10%
