

Pneumatic Impulse Sealer - Foot Pedal Operated

The AVP series was designed for heavy-duty applications. The most evident feature of the AVP is its lack of visible controls. Form follows function providing an expansive clear work surface to hold product ready to be sealed. Side mounted heat and cool timers fitted to a powder coated steel chassis regulate seal parameters that are critical to obtaining airtight/watertight seals. A one-tap steel encased foot switch provides hands-free operation. And, of key significance, like the AVN and AVS, the AVP will not fire an impulse until the upper and lower jaw completely meet, further ensuring operator safety and uncompromised seal integrity. The air gauge is top grade for accurate calibration. The pressure bar is powder coated aluminum. Made of professional grade components, the AVP is still lightweight enough (29 lbs.) to be moved effortlessly in your facility.

Specifications:

- Seal Length: 50.8cm
- Seal Width: 6.35mm
- Vacuum Flow: N/A
- Max Vacuum Pressure: N/A
- Air Requirements: 1 CFM @ 90PSI
- Amps @ 120VAC: 6
- Unit Size: 71.1cm L x 25.4cm W x 17.8 H
- Approximate Weight: 29 lbs.
